Summary

Highly motivated and ambitious professional transitioning into the tech industry from a background in finance and banking. This shift is driven by a strong desire for personal and professional growth, and the goal to align my career with my intrinsic interests and strengths. Over the past few years, I have been building a portfolio of hands-on projects that demonstrate my technical skills and problem-solving abilities. My experience in finance, particularly in managerial roles, has equipped me with transferable soft skills, including leadership, organizational management, and effective teamwork.

Projects

MyClinic | [Github](https://github.com) - www.myclinic.tech

Technologies Used: Next.js | Typescript | PostgreSQL

- Built a responsive Full Stack application designed for managing various aspects of a private clinic, from appointment scheduling to managing doctors permissions and vacation days. It emphasizes security and user experience, ensuring that sensitive data is handled securely while offering an intuitive interface for both clinic staff and patients.
- Led full-stack development implementing user authentication, appointment bookings, and dynamic doctor availability.

GreenEats | [Github](https://github.com) - <https://greeneats-s2i.vercel.app>

Technologies Used: React | Tailwindcss | Spoonacular APIs

- Built a responsive application powered by Spoonacular APIs, offering users access to a wide array of vegetarian recipes, custom meal planning, ingredient search, and step by step cooking guides.

Experience

NSA S.p.A. | Supervisor

Brescia, Italy | 08.2017 - Current

- Led a team of professionals in facilitating financing between financial institutions and corporate clients, overseeing team management and ensuring smooth operations.
- Conducted financial analysis and prepared comprehensive reports on client companies to support decision-making processes and facilitate effective communication with stakeholders.

Skills

Frontend: HTML | CSS | TailwindCSS | Javascript | React | Typescript | Bootstrap | Web3.js

Backend: Node.js | Express | MongoDB | Python | PostgreSQL | Redis | Solidity

Frameworks: NextJS | Django | Flask | Hardhat
